

National Weather Service Tallahassee, Florida

- **Basic Spotter Class Scheduled for Fall 2011!!**
-

Spotter course description:

Basic spotter classes cover thunderstorm components, basic weather terminology, weather safety, and during the summer months, explore important hurricane season facts. Training typically lasts around 90 minutes. New with our fall spotter training will be the ability to “live chat” with a NWS Meteorologist during the presentation who can answer any questions you may have about the course material.

These classes are open to all interested users.

At the conclusion of each course, participants can take a test to check their understanding of these topics and register as a trained spotter with the National Weather Service in Tallahassee, Florida.

Course Schedule:

Basic Spotter Courses:

Date: Monday, November 14, 2011 at 6 pm ET (5 pm CT)
